

## Energy Transfer Announces FERC Approval for Final Two Laterals on the Rover Pipeline

November 2, 2018

*Latest Issuance Allows for All Remaining Facilities to Be Placed in Service*

DALLAS--(BUSINESS WIRE)--Nov. 2, 2018-- Energy Transfer LP (NYSE: ET) announced today that Rover Pipeline, LLC received approval from the Federal Energy Regulatory Commission (FERC) to commence natural gas service on the final laterals needed to complete the Rover Pipeline project. The Sherwood Lateral, the CGT Lateral and the associated compression and metering facilities located in West Virginia are now in service. The 713-mile pipeline transports up to 3.25 billion cubic feet per day of natural gas from the Marcellus and Utica Shale production areas.

Rover has been operational since August 31, 2017; however, this final approval allows the pipeline to add an additional receipt point and delivery point for natural gas production in West Virginia. Rover transports natural gas from processing plants in West Virginia, Eastern Ohio and Western Pennsylvania to the Midwest Hub near Defiance, Ohio, for delivery to markets across the U.S., as well as to the Union Gas Dawn Storage Hub in Ontario, Canada.

### **About the Partnerships**

Energy Transfer LP (NYSE: ET) owns and operates one of the largest and most diversified portfolios of energy assets in the United States, with a strategic footprint in all of the major domestic production basins. ET is a publicly traded limited partnership with core operations that include complementary natural gas midstream, intrastate and interstate transportation and storage assets; crude oil, natural gas liquids (NGL) and refined product transportation and terminalling assets; NGL fractionation; and various acquisition and marketing assets.
