PROPOSED ETE / WMB MERGER WOULD CREATE WORLD'S LARGEST ENERGY INFRASTRUCTURE GROUP

- Energy Transfer Equity, L.P. ("ETE") has made a proposal to acquire The Williams Companies, Inc. ("WMB") in an all equity transaction valued at approximately \$53 billion, including approximately \$4.6 billion of recourse debt outstanding at WMB
 - Implied offer price of \$64.00 per WMB share, which represents a 32.4% premium to unaffected WMB trading price⁽¹⁾
 - The number of ETE Corp shares to be issued to WMB stockholders will be based on a fixed exchange ratio of 0.9358x⁽²⁾ ETE Corp shares for each WMB share
 - ETE would form an Up-C holding company (ETE Corp) to merge in a tax free transaction with WMB
- Transaction would create largest energy infrastructure group in the world, third largest energy franchise in North America and one of the top five largest global energy enterprises
 - Combination would create a truly unique and diversified collection of compatible businesses that would be among the largest energy companies in the world
 - Creates the first midstream "super major"
 - \$185+ billion organization with over \$10 billion of pro forma EBITDA
 - Will result in a broader, more diversified platform that would achieve balance and drive cash flow growth for all stakeholders
- Significant value creation to all ETE / WMB constituencies
 - Expected to create new commercial opportunities with meaningful synergy potential
 - ETE committed to continuing to improve the overall operational performance and execution at WMB and WPZ
 - ETE's distribution growth rate would continue to remain best in class for the foreseeable future
 - Expected to enhance credit profile through greater scale, cash flow diversity and sharing in synergy potential
 - Creation of ETE Corp expected to broaden the overall spectrum of institutional investors that have been eager to invest in ETE and provide even greater liquidity to existing ETE unitholders

WE BELIEVE ETE'S PROPOSED OFFER IS A SUPERIOR TRANSACTION TO THE WILLIAMS PARTNERS L.P. ("WPZ") MERGER DUE TO THE SIGNIFICANT PREMIUM TO WMB'S CURRENT TRADING PRICE AS WELL AS THE LONG-TERM VALUE OF THE ETE CORP EQUITY TO BE ISSUED IN THE PROPOSED MERGER

1. Based on WMB's closing price of \$48.34 on June 19th, 2015
2. Based on ETE's offer of \$64.00 per WMB share and ETE's unit price of \$68.39 as of June 19, 2015

Cash flow contribution by Credit Ratings

- (1) ETP distributions in 2007 are for the fiscal year ended 8/31/07; all successive fiscal years end 12/31. Figures exclude ETE SG&A. 2012 and 2013 ETP GP + IDRs include dividends from Holdco. Class H includes ~50% (~90% after SXL / Bakken transfer) of SXL GP and IDR cash flows, excluding the impact of IDR subsidies and subsidy offsets.
- (2) ETP 2015E distributions are based on reported 1Q'15 distributions, as adjusted based on an assumed \$0.02 per unit per quarter distribution increase, and based on assumed ETP equity issuances during the remainder of 2015. ETP has not provided guidance related to its cash distributions for 2015 and the assumed \$0.02 per unit increase per quarter for the remainder of 2015 is based on the pattern of recent ETP distribution increases. SXL has provided public guidance that it anticipates that it will increase its cash distributions 5% per quarter during 2015. The actual amount of cash distributions by each of ETP and SXL will be subject to the actual performance of their respective businesses and other factors as described in their respective SEC filings as well as approval by their respective boards of directors.

- (4) Assumes AA rating for unencumbered LC LNG cash flows (current Shell rating).

WHY WE BELIEVE PROPOSED ETE CORP / WMB MERGER IS SUPERIOR TO WMB / WPZ RESTRUCTURING

	ETE Corp / WMB Merger	WMB / WPZ Restructuring
Strategic Rationale	<ul style="list-style-type: none"> WMB stockholders would benefit from the strong cash distribution growth profile of ETE common units, derived from incentive distribution rights in three MLPs (ETP, SXL and WPZ) WPZ unitholders will realize material upfront cost savings and synergies as a member of the Energy Transfer family Transaction would create substantial value that would not be realized otherwise, including the ability to find new commercial opportunities within the expanded asset base 	<ul style="list-style-type: none"> A defensive, financial restructuring transaction which in our view lacks strategic benefits <ul style="list-style-type: none"> Low coverage ratio of distributable cash flow to dividends Limited ability to increase dividends at guidance levels without hurting coverage Limited ability to withstand increased commodity price volatility while maintaining coverage and promised distribution growth Significant adverse tax consequences for many WPZ unitholders
Premium	 32.4% ⁽¹⁾ premium to WMB stockholders	 No premium to WMB stockholders
Accretion	 Dividend per share would exceed what WMB has forecasted stockholders will receive from the restructuring	 Lower dividend per share accretion in a smaller, less diversified business with greater business risk
Dividend Growth	 Dividend growth far superior to that of WMB standalone or pro forma for the restructuring	 Lower forecasted dividend growth with limited upside potential
Synergies	 Meaningful synergy potential – at least \$300-400 million of annual synergies expected	 No guidance provided on synergy potential from the restructuring with limited scope for new commercial opportunities
Maximize Value	 A truly unique and diversified collection of compatible businesses that would drive near- and long-term value for all stakeholders	 Restructuring does nothing to enhance the overall asset base or operating performance of the company
Transaction Certainty	 <ul style="list-style-type: none"> WMB stockholder vote required Minimal asset overlap; “hell or high water” commitment by ETE to obtain HSR clearance No ETE unitholder vote required 	 <ul style="list-style-type: none"> WMB stockholder vote required No WPZ unitholder vote required

BENEFITS OF ETE PROPOSAL TO WILLIAMS STAKEHOLDERS

Expected Benefits to WMB

- Participation in rapidly consolidating midstream space with premium operating franchise / platform where diversity of asset base, scale, and scope of operations are critical to value maximization
- Unique powerhouse that derives its strength from two of the largest diversified MLPs in the U.S., the second largest crude and logistics MLP, a fast growing retail fuel MLP and a highly attractive LNG export opportunity
- Offer price represents a significant premium to WMB's current trading price
- Distribution accretion relative to announced WMB guidance
- Holders of ETE Corp shares would receive a dividend growth rate that exceeds current WMB forecast
- Exchange of WMB shares for ETE Corp shares would be tax-free to WMB stockholders and ETE Corp shares would have considerable liquidity

Expected Benefits to WPZ

- The combination would create new commercial opportunities for WPZ, including the potential to acquire assets from the overall Energy Transfer group
- WPZ unitholders would benefit from having a general partner that would be in a position to be able to help WPZ fully realize its long-term growth potential
- WPZ unitholders would be able to realize material upfront cost savings and synergies because WPZ would join the Energy Transfer shared service model that would result in more distributable cash flow for WPZ
- There is no expected impact to WPZ's credit ratings as a result of the ETE / WMB combination
- WPZ unitholders are not expected to incur any adverse tax consequences as a result of a combination of WMB and ETE as compared to potential significant adverse tax consequences for many WPZ unitholders in the proposed WMB / WPZ restructuring
- Receipt of \$410 million break fee in the form of an IDR subsidy

COMBINATION WOULD CREATE A TRULY UNIQUE AND DIVERSIFIED COLLECTION OF COMPATIBLE BUSINESSES THAT WOULD DRIVE NEAR- AND LONG-TERM VALUE FOR ALL STAKEHOLDERS

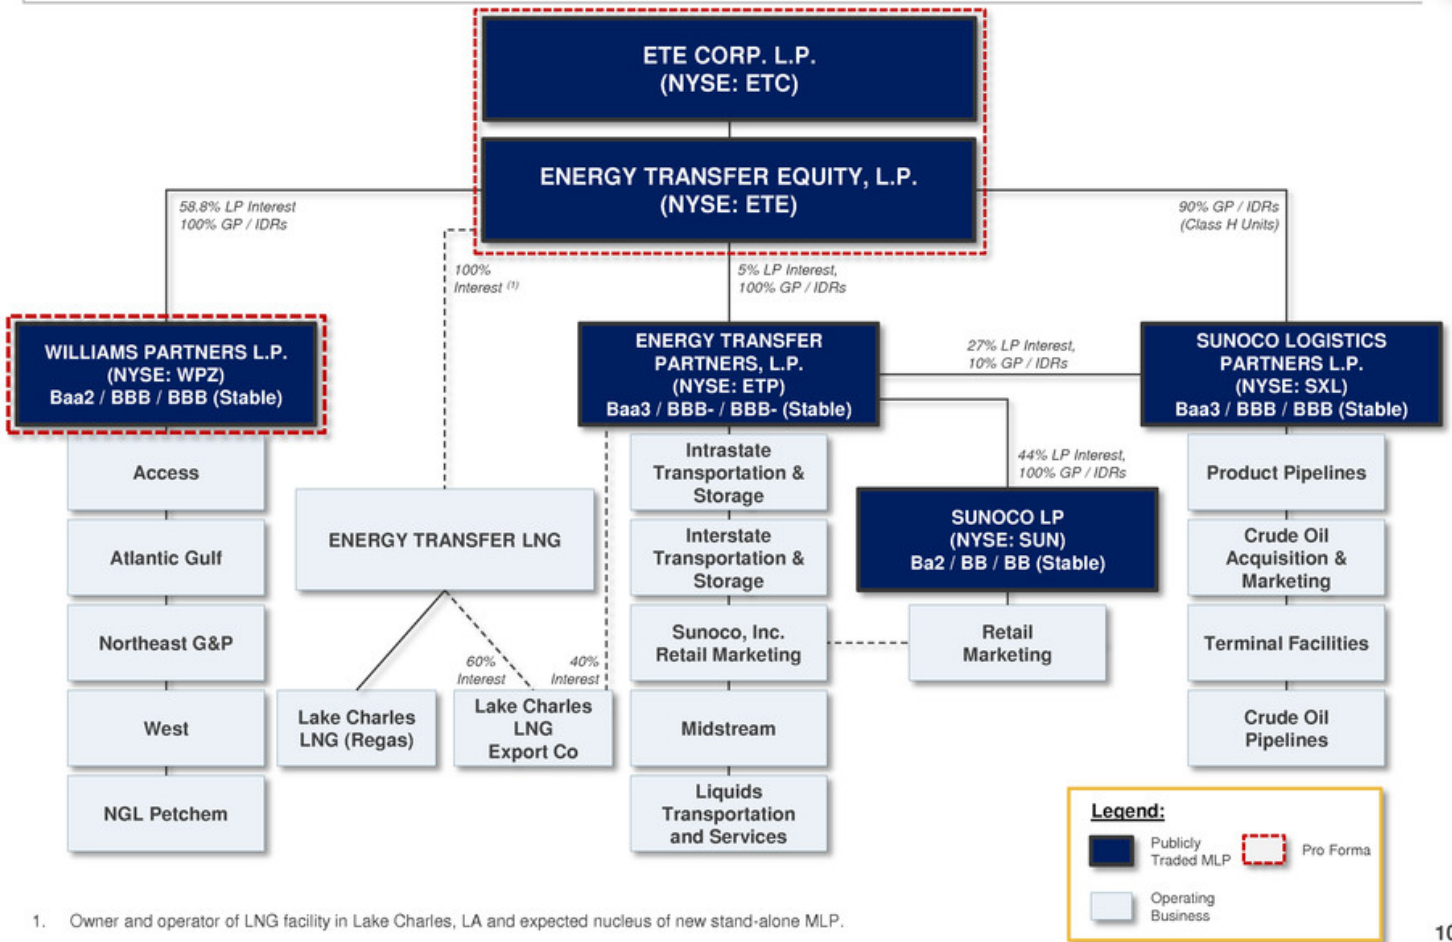

EXPECTED BENEFITS TO ETE STAKEHOLDERS

- Transaction would be immediately accretive to distributable cash flow for ETE
- A combination of ETE and WMB would create the world's largest energy infrastructure group and third largest energy franchise in North America, with improved cash flow diversification and financial strength
- Creates a unique collection of compatible businesses that would drive near- and long-term value for ETE unitholders
- Continues to increase the overall strategic and financial optionality for the Energy Transfer group
- New commercial opportunities within the expanded asset base would increase and, as a result, create more cash flow growth
- Ability of ETE to broaden its overall spectrum of institutional investors is enhanced through the C-corp entity structure
- Increased liquidity for ETE unitholders because of the ability to exchange ETE common units for common shares in the newly created ETE Corp (after closing of the WMB merger)
- Fundamental belief of insiders that founded the Energy Transfer group and that today own 25-30% of ETE that this is the "right merger at the right time"

ETE's DISTRIBUTION GROWTH RATE WOULD CONTINUE TO REMAIN BEST IN CLASS AND THE DURATION OF THAT LEADING PERFORMANCE WOULD BE LONGER AS A RESULT OF THE MERGER
