### **ENERGY TRANSFER REPORTS SECOND QUARTER 2019 RESULTS**

- Net income attributable to partners of \$878 million, reflecting an increase over previous period primarily due to higher operating income and the impact of the simplification transaction.
- Record Adjusted EBITDA of \$2.82 billion, up 25 percent from the second quarter of 2018.
- Distributable Cash Flow attributable to partners of \$1.60 billion, up 23 percent from the second quarter of 2018.
- Distribution coverage ratio of 2.00x, yielding excess coverage of \$800 million of Distributable Cash Flow attributable to partners in excess of distributions.
- Increases 2019 outlook for Adjusted EBITDA to approximately \$10.8 billion to \$11.0 billion and reduces capital expenditures to approximately \$4.6 billion to \$4.8 billion.

Dallas - August 7, 2019 - Energy Transfer LP (NYSE:ET) ("ET" or the "Partnership") today reported financial results for the quarter ended June 30, 2019.

ET reported net income attributable to partners for the three months ended June 30, 2019 of \$878 million, an increase of \$523 million compared to the three months ended June 30, 2018. For the prior period, net income attributable to partners continues to reflect only the amount of net income attributable to the legacy Energy Transfer LP partners prior to the simplification merger transaction of ET and Energy Transfer Operating, L.P. ("ETO") on October 19, 2018 (the "Merger").

Adjusted EBITDA for the three months ended June 30, 2019 was \$2.82 billion, an increase of \$562 million compared to the three months ended June 30, 2018. Results were supported by significant increases in four of the Partnership's five core segments, with record operating performance in the Partnership's NGL and refined products segment.

Distributable Cash Flow attributable to partners, as adjusted, for the three months ended June 30, 2019 was \$1.60 billion, an increase of \$301 million compared to the three months ended June 30, 2018. The increase was primarily due to the increase in Adjusted EBITDA.

### Key accomplishments and current developments:

### **Operational**

- ET announces its eighth natural gas liquids (NGL) fractionation facility at Mont Belvieu, Texas. Fractionator VIII will be a 150,000 barrel per day fractionator that is scheduled to be in service in the second quarter of 2021. With the addition of Fractionator VIII, ET will have more than one million barrels per day of fractionation capacity at Mont Belvieu.
- ET announced a binding supplemental open season in July 2019 to solicit additional shipper commitments that would further support a capacity optimization on the Bakken pipeline system.
- The Permian Express 4 expansion is ongoing, and ET expects to have the project, which adds 120,000 barrels per day of capacity from the Permian Basin to Gulf Coast markets, in-service by the end of the third quarter of 2019.
- ET and Sunoco LP closed on the JC Nolan Pipeline joint venture in July 2019 and successfully commissioned the diesel fuel pipeline in West Texas this week.
- Construction is ongoing at ET's ethane storage tank and chilling facilities in Nederland, Texas with an expected in-service date in the fourth quarter of 2020

### Strategic

• ET opened an office in Beijing in April and continues to expand its international marketing efforts to meet growing demand for LNG and NGL products.

### **Financial**

- In July 2019, ET announced a quarterly distribution of \$0.305 per unit (\$1.220 annualized) on ET common units for the quarter ended June 30, 2019. The distribution coverage ratio for the second quarter of 2019 is 2.00x.
- As of June 30, 2019, ETO's \$6.00 billion revolving credit facilities had an aggregate \$3.56 billion of available capacity, and ETO's leverage ratio, as defined by its credit agreement, was 3.61x.

ET benefits from a portfolio of assets with exceptional product and geographic diversity. The Partnership's multiple segments generate high-quality, balanced earnings with no single segment contributing more than 30 percent of the Partnership's consolidated Adjusted EBITDA for the three months ended June 30, 2019. The great majority of the Partnership's segment margins are fee-based and therefore have limited commodity price sensitivity.

#### **Conference Call information:**

The Partnership has scheduled a conference call for 8:00 a.m. Central Time, Thursday, August 8, 2019 to discuss its second quarter 2019 results. The conference call will be broadcast live via an internet webcast, which can be accessed through <a href="https://www.energytransfer.com">www.energytransfer.com</a> and will also be available for replay on the Partnership's website for a limited time.

(a) The closing of the Merger has impacted the Partnership's calculation of Distributable Cash Flow attributable to partners, as well as the number of ET Common Units outstanding and the amount of distributions to be paid to partners for the three and six months ended June 30, 2018. In order to provide information on a comparable basis for pre-Merger and post-Merger periods, the Partnership has included certain pro forma information for the three and six months ended June 30, 2018.

Pro forma Distributable Cash Flow attributable to partners reflects the following merger related impacts:

- ETO is reflected as a wholly-owned subsidiary and pro forma Distributable Cash Flow attributable to partners reflects ETO's consolidated Distributable Cash Flow (less certain other adjustments);
- · Distributions from Sunoco LP and USAC include distributions to both ET and ETO; and
- Distributable Cash Flow attributable to noncontrolling interests in our other non-wholly-owned subsidiaries is subtracted from consolidated Distributable Cash Flow to calculate Distributable Cash Flow attributable to partners.

Pro forma distributions to partners include actual distributions to legacy ET partners, as well as pro forma distributions to legacy ETO partners. Pro forma distributions to ETO partners are calculated assuming (i) historical ETO common units converted under the terms of the Merger and (ii) distributions on such converted common units were paid at the historical rate paid on ET Common Units.

Pro forma Common Units outstanding include actual Common Units outstanding, in addition to Common Units assumed to be issued in the Merger, which are based on historical ETO common units converted under the terms of the Merger.

(b) Adjusted EBITDA, Distributable Cash Flow and distribution coverage ratio are non-GAAP financial measures used by industry analysts, investors, lenders and rating agencies to assess the financial performance and the operating results of ET's fundamental business activities and should not be considered in isolation or as a substitute for net income, income from operations, cash flows from operating activities or other GAAP measures.

There are material limitations to using measures such as Adjusted EBITDA, Distributable Cash Flow and distribution coverage ratio, including the difficulty associated with using either as the sole measure to compare the results of one company to another, and the inability to analyze certain significant items that directly affect a company's net income or loss or cash flows. In addition, our calculations of Adjusted EBITDA, Distributable Cash Flow and distribution coverage ratio may not be consistent with similarly titled measures of other companies and should be viewed in conjunction with measurements that are computed in accordance with GAAP, such as segment margin, operating income, net income and cash flow from operating activities.

### Definition of Adjusted EBITDA

We define Adjusted EBITDA as total partnership earnings before interest, taxes, depreciation, depletion, amortization and other non-cash items, such as non-cash compensation expense, gains and losses on disposals of assets, the allowance for equity funds used during construction, unrealized gains and losses on commodity risk management activities, inventory valuation adjustments, non-cash impairment charges, losses on extinguishments of debt and other non-operating income or expense items. Adjusted EBITDA reflects amounts for less than wholly-owned subsidiaries based on 100% of the subsidiaries' results of operations and for unconsolidated affiliates based on our proportionate ownership.

Adjusted EBITDA is used by management to determine our operating performance and, along with other financial and volumetric data, as internal measures for setting annual operating budgets, assessing financial performance of our numerous business locations, as a measure for evaluating targeted businesses for acquisition and as a measurement component of incentive compensation.

### Definition of Distributable Cash Flow

We define Distributable Cash Flow as net income, adjusted for certain non-cash items, less distributions to preferred unitholders and maintenance capital expenditures. Non-cash items include depreciation, depletion and amortization, non-cash compensation expense, amortization included in interest expense, gains and losses on disposals of assets, the allowance for equity funds used during construction, unrealized gains and losses on commodity risk management activities, inventory valuation adjustments, non-cash impairment charges, losses on extinguishments of debt and deferred income taxes. For unconsolidated affiliates, Distributable Cash Flow reflects the Partnership's proportionate share of the investee's distributable cash flow.

Distributable Cash Flow is used by management to evaluate our overall performance. Our partnership agreement requires us to distribute all available cash, and Distributable Cash Flow is calculated to evaluate our ability to fund distributions through cash generated by our operations.

On a consolidated basis, Distributable Cash Flow includes 100% of the Distributable Cash Flow of ET's consolidated subsidiaries. However, to the extent that noncontrolling interests exist among our subsidiaries, the Distributable Cash Flow generated by our subsidiaries may not be available to be distributed to our partners. In order to reflect the cash flows available for distributions to our partners, we have reported Distributable Cash Flow attributable to partners, which is calculated by adjusting Distributable Cash Flow (consolidated), as follows:

- For subsidiaries with publicly traded equity interests, other than ETO, Distributable Cash Flow (consolidated) includes 100% of Distributable Cash Flow attributable to our partners includes distributions to be received by the parent company with respect to the periods presented.
- For consolidated joint ventures or similar entities, where the noncontrolling interest is not publicly traded, Distributable Cash Flow (consolidated) includes 100% of Distributable Cash Flow attributable to such subsidiaries, but Distributable Cash Flow attributable to partners reflects only the amount of Distributable Cash Flow of such subsidiaries that is attributable to our ownership interest.

For Distributable Cash Flow attributable to partners, as adjusted, certain transaction-related adjustments and non-recurring expenses that are included in net income are excluded.

Definition of Distribution Coverage Ratio

Distribution coverage ratio for a period is calculated as Distributable Cash Flow attributable to partners, as adjusted, divided by distributions expected to be paid to the partners of ET in respect of such period.

(c) The amounts reflected for the six months ended June 30, 2018 includes distributions to unitholders who elected to participate in a plan to forgo a portion of their future potential cash distributions on common units and reinvest those distributions in ETE Series A convertible preferred units representing limited partner interests in the Partnership for the six months ended June 30, 2018. The quarter ended March 31, 2018 was the final quarter of participation in the plan.

### ENERGY TRANSFER LP AND SUBSIDIARIES SUMMARY ANALYSIS OF QUARTERLY RESULTS BY SEGMENT

(Tabular dollar amounts in millions) (unaudited)

As a result of the Merger in October 2018, our reportable segments were reevaluated during the quarter ended December 31, 2018 and currently reflect the following segments.

	Three Months Ended June 30,		
	 2019		2018
Segment Adjusted EBITDA:			
Intrastate transportation and storage	\$ 290	\$	208
Interstate transportation and storage	460		375
Midstream	412		414
NGL and refined products transportation and services	644		461
Crude oil transportation and services	751		548
Investment in Sunoco LP	152		140
Investment in USAC	105		95
All other	10		21
Total Segment Adjusted EBITDA	\$ 2,824	\$	2,262

In the following analysis of segment operating results, a measure of segment margin is reported for segments with sales revenues. Segment margin is a non-GAAP financial measure and is presented herein to assist in the analysis of segment operating results and particularly to facilitate an understanding of the impacts that changes in sales revenues have on the segment performance measure of Segment Adjusted EBITDA. Segment margin is similar to the GAAP measure of gross margin, except that segment margin excludes charges for depreciation, depletion and amortization.

Following is a reconciliation of our segment margin to operating income, as reported in the Partnership's consolidated statements of operations:

	Three Months Ended June 30,			ded

Segment Adjusted EBITDA	\$	290	\$	208	

Transported volumes increased primarily due to the impact of the Red Bluff Express pipeline coming online in May 2018, as well as the impact of favorable market pricing spreads.

*Segment Adjusted EBITDA*. For the three months ended June 30, 2019 compared to the same period last year, Segment Adjusted EBITDA related to our intrastate transportation and storage segment increased due to the net impacts of the following:

- · an increase of \$65 million in realized natural gas sales and other due to higher realized gains from pipeline optimization activity; and
- an increase of \$14 million in transportation fees primarily due to new contracts, as well as the impact of the Red Bluff Express pipeline coming online in May 2018.

Segment Adjusted EBITDA	\$	460	\$	375

Transported volumes reflected an increase of 2,118 BBtu/d as a result of the following: the Rover pipeline being placed fully in-service in November 2018; production increases in the Haynesville Shale and deliveries to intrastate markets resulting in increased deliveries off of our Tiger pipeline; and increased utilization of higher contracted capacity on the Panhandle and Trunkline pipelines.

*Segment Adjusted EBITDA*. For the three months ended June 30, 2019 compared to the same period last year, Segment Adjusted EBITDA related to our interstate transportation and storage segment increased due to the net impacts of the following:

- an increase of \$69 million from placing the Rover pipeline fully in-service, resulting in an increase of \$101 million in revenues, partially offset by an increase of \$32 million in operating expenses;
- $\bullet \quad \text{increases of $\$5$ million and $\$3$ million from higher utilization of our Transwestern and Trunkline pipeline systems, respectively;}\\$
- $\bullet \quad \text{an increase of $\$3$ million for additional gas processing revenues on our Panhandle system;}\\$

- an increase of \$3 million from additional volume delivered from our Sea Robin pipeline as a result of fewer third-party supply interruptions; and
- an increase of \$2 million in Adjusted EBITDA from unconsolidated affiliates primarily due to new fixed transportation contracts on Citrus.

### Midstream

Segment Adjusted EBITDA	\$ 412	\$	414

Gathered volumes and NGL production increased primarily due to increases in the Northeast, North Texas, South Texas, Permian and Ark-La-Tex regions, partially offset by smaller declines in the Mid-Continent/Panhandle regions.

Segment Adjusted EBITDA. For the three months ended June 30, 2019 compared to the same period last year, Segment Adjusted EBITDA related to our midstream segment decreased slightly due to the net effects of the following:

- a decrease of \$30 million in non-fee-based margin due to lower NGL prices of \$35 million and lower gas prices of \$15 million, partially offset by the impact of increased throughput volume in the Permian region of \$20 million;
- an increase of \$20 million in operating expenses due to an increase of \$10 million in outside services, \$7 million in maintenance project costs, and \$3 million in employee costs; and
- an increase of \$3 million in selling, general and administrative expenses due to an increase in allocated overhead and an insurance payment received in the second quarter of 2018; partially offset by
- an increase of \$51 million in fee-based margin due to volume growth in the Northeast, Permian, Ark-La-Tex, North Texas and South Texas regions, offset by declines in the Mid-Continent/Panhandle regions.

Segment Adjusted EBITDA	\$ 644	\$	461

NGL transportation volumes increased as a result of placing Mariner East 2 pipeline in service and higher throughput volumes on our Texas NGL pipeline system resulting primarily from increased production in the Permian and North Texas regions.

Refined products transportation volumes decreased slightly primarily due to refinery turnarounds in the Northeast and Midwest regions.

NGL and refined products terminal volumes increased primarily at Marcus Hook due to the initiation of service on our Mariner East 2 pipeline which commenced operations in the fourth quarter of 2018, an increase in volumes loaded at our Nederland terminal due to increased export demand and higher throughput volumes at our refined product terminals in the Northeast.

Average fractionated volumes at our Mont Belvieu, Texas fractionation facility increased primarily due to the commissioning of our fifth and sixth fractionators in July 2018 and February 2019, respectively.

Segment Adjusted EBITDA. For the three months ended June 30, 2019 compared to the same period last year, Segment Adjusted EBITDA related to our NGL and refined products transportation and services segment increased due to net impacts of the following:

- an increase of \$132 million in transportation margin primarily due to a \$67 million increase resulting from the initiation of service on our Mariner East 2 pipeline in the fourth quarter of 2018, a \$55 million increase resulting from higher throughput volumes received from the Permian region on our Texas NGL pipelines, a \$7 million increase due to higher throughput volumes received from the Barnett region and a \$3 million increase due to higher throughput volumes received from the Eagle Ford region;
- an increase of \$55 million in terminal services margin primarily due to a \$51 million increase at Marcus Hook resulting from the initiation of service on our Mariner East 2 pipeline in the fourth quarter of 2018 and a \$3 million increase due to higher throughput at our refined product terminals in the Northeast;
- an increase of \$46 million in fractionation and refinery services margin primarily due to a \$50 million increase resulting from the commissioning of our
  fifth and sixth fractionators in July 2018 and February 2019, respectively, and higher NGL volumes from the Permian region feeding our Mont Belvieu
  fractionation facility. This increase was partially offset by a \$3 million decrease primarily resulting from a reclassification between our fractionation and
  storage margins; and
- an increase of \$5 million in storage margin primarily due to a \$3 million increase resulting from a reclassification between our storage and fractionation margins and a \$2 million increase from throughput pipeline fees collected at our Mont Belvieu storage facility; partially offset by
- a decrease of \$35 million in marketing margin primarily due to a decrease of \$16 million from the write down of the value of stored NGL inventory, as well as lower optimization gains due to less favorable market conditions;

- an increase of \$14 million in operating expenses primarily due to a \$4 million increase resulting from to the commissioning of our fifth and sixth fractionators in July 2018 and February 2019, respectively, an aggregate increase of \$7 million in ad valorem and employee expenses on our terminal and fractionation assets, and a \$2 million increase in allocated costs; and
- an increase of \$9 million in selling, general and administrative expenses primarily due to a \$4 million increase in allocated overhead costs, a \$2 million increase in legal fees, a \$1 million increase in employee costs and a \$1 million increase in insurance expenses.

Crude transportation and terminal volumes benefited from an increase in barrels through our existing Texas pipelines and our Bakken pipeline.

Segment Adjusted EBITDA. For the three months ended June 30, 2019 compared to the same period last year, Segment Adjusted EBITDA related to our crude oil transportation and services segment increased due to the net impacts of the following:

- an increase of \$216 million in segment margin (excluding unrealized gains and losses on commodity risk management activities) primarily due to a \$142 million increase from higher throughput on our Texas crude pipeline system primarily due to increased production from the Permian region, a \$75 million increase from higher throughput on the Bakken pipeline, and a \$9 million increase from higher throughput, ship loading and tank rental fees at our Nederland terminal; partially offset by a \$10 million decrease (excluding a net change of \$251 million in unrealized gains and losses on commodity risk management activities) from our crude oil acquisition and marketing business primarily resulting from non-cash inventory valuation adjustments; partially offset by
- an increase of \$6 million in operating expenses primarily due to a \$14 million increase in throughput-related costs on existing assets, partially offset by an \$8 million decrease in ad valorem taxes and management fees; and
- a decrease of \$7 million in Adjusted EBITDA related to unconsolidated affiliates due to lower margin from jet fuel sales by our joint ventures.
